PROFILE

Software Developer based in Moscow, Russia, with a strong focus on iOS development. I bring over four years of experience in system analysis within large-scale banking projects, with expertise in SQL, Data Warehousing, and Agile methodologies. Currently completing an iOS Development course at Netology, I am actively seeking part-time or contract iOS Developer positions, preferably remote or with opportunities for relocation to the UAE, North America, or Europe. My background in tech support, team leadership, and customer communication further strengthens my ability to deliver high-quality software solutions.

EXPERIENCE

QA Engineer, Innotech (Moscow, RU) — Jan 2023 - Present

- Managed product releases, including scrum artifacts and demos for business users and the cybersecurity department
- Conducted manual and automated testing of new features, ensuring quality and functionality
- Developed, documented, and launched internal software tools using Python, AirFlow API, and Jira API
- Ensured quality assurance for regular releases and hot-fixes
- Created user manuals and documentation for custom testing instruments.
- Led onboarding sessions for new testers and analysts

Analyst, Digital Economy League (Moscow, RU) — Aug 2020 - Dec 2022

- Contributed to a database architecture project for a leading Russian bank with over 13.9 million individual and 500,000 corporate clients.
- Architected Logical Data Models (LDMs) using SAP PowerDesigner, ensuring compliance and integration
- Temporarily led an Agile team and conducted manual and automated testing of new features
- Communicated effectively with high-level professionals and stakeholders
- Managed testing and release processes, including test reports, documentation, and Jira updates

Consultant / Intern Consultant EF English First (Moscow, Russia) — Mar 2018 - Aug 2020, Aug 2017 — Oct 2017

- Contributed to teaching English to children and teenagers, growing the student base from 740 to over 950 through sales
- Assisted in the transition to E-Learning during the 2020 pandemic, providing technical support on various platforms
- Achieved a conversion rate of up to 100% per month and delivered product presentations to potential clients
- Supported a campus during the high season and volunteered at marketing events
