Agile / Scrum, excellent communication skills, presentation and public speaking, onboarding colleagues, Advanced English

EXPERIENCE

DWH Analyst, Databorn (Remote) — Nov 2025 - Present

- Working on a DWH migration project for one of the biggest banks of Kazakhstan (top-3)
- Building prototypes and data models for complex data marts, designing and optimising complex Oracle SQL queries using window functions and CTEs, researching data sources and optimising performance
- Delivered 8+ crucial reports (50+ fields and complex business rules and calculations) for Risk Department that are now used for bank's business processes and management decisions.
- Interviewing and collecting business requirements from business owners, data mart users and stakeholders
- Participating in the full lifecycle of data products from researching references and sources to UAT and production deployment

DWH Analyst (QA Team), Innotech (Moscow, RU) — Jan 2023 - Nov 2025

- Acted as a DWH Analyst within QA team, focusing on data quality, source system analysis and DWH pipelines validation
- Managed product releases, including scrum artifacts and demos for business users and the cybersecurity department
- Analysed source systems and investigated data inconsistencies
- Performed data validation using PostgreSQL queries

- Conducted manual and automated testing of new features, ensuring quality and functionality
- Developed internal automation tools using Python, AirFlow API, Jira API to automate flow execution, collect statistics and generate artifacts
- Created user manuals and documentation for custom testing instruments.
- Led onboarding sessions for new employees

DWH Analyst, Digital Economy League (Moscow, RU) — Aug 2020 - Dec 2022

- Contributed to a database architecture project for a leading Russian bank with over 13.9 million individual and 500,000 corporate clients.
- Architected Logical Data Models (LDMs) using SAP PowerDesigner, ensuring compliance and integration
- Temporarily led an Agile team and conducted manual and automated testing of new features
- Communicated effectively with high-level professionals and stakeholders
- Managed testing and release processes, including test reports, documentation, and Jira updates

Consultant, EF English First (Moscow, Russia) — Mar 2018 - Aug 2020, Aug 2017 — Oct 2017

- Contributed to teaching English to children and teenagers, growing the student base from 740 to over 950 through sales
- Assisted in the transition to E-Learning during the 2020 pandemic, providing technical support on various platforms
- Achieved a conversion rate of up to 100% per month and delivered product presentations to potential clients
- Supported a campus during the high season and volunteered at marketing events

EDUCATION

MIREA Russian Technological University — Specialist, 2017 - 2023

Major: Information and Analytical security systems
